

Logic 2.0

The **Logical** choice is the **economical** choice.

Fits screw-on...

and push-on

The true cost of replacing nose pads goes well beyond the cost of the pad itself. Inflated inventories and costly searching time are profit killers. Logic's dual purpose insert and symmetrical design reduce inventories and speed the selection process, making your business more efficient and more profitable... something standard nose pads can't offer.

*Isn't that a more Logical approach to Nose Pad economics?*
